Trade profitably in bull, bear or sideways markets

Laurens Bendsorp has been beating the markets for 20 years with his revolutionary approach to stress-free trading. Join the newsletter today to get notified of new blog posts about systems and strategies you can use to beat the indexes in as little as 30 minutes a day!

Part 2: Headline in the Middle of the Page

Discover the systems used by the elite traders in the world

To consistently outperform the markets

Laurens Bendsorp shares all the details in these blog posts

Part 3: About Laurens

Laurens Bendsorp is one of the most successful investors in the world.

He began his journey in capital management and finance at a boutique venture capital firm in the Netherlands in 2000. But Laurens' success in the market came only after some initial pain and suffering.

As a young investor, he lost more than 30% of his parents' portfolio.

Determined to find his own way to beat the market, he spent the next 10 years of his life researching and testing a series of algorithms that have allowed him to enjoy double-digit annual returns year after year, even during market crashes...in just 15 minutes a day.

Bendsorp invested tens of thousands of hours studying the most successful investors in the world and the strategies they employed. He carefully developed a simple, predictable, and consistently profitable automated trading system built upon multiple, non-correlated systems that regularly outperforms the market while limiting risk and reducing the trader's actual time and involvement in trading to virtually zero.

Using his unique market strategy, Laurens climbed his way to the top of investing elites and is now in the top 1% of traders in the world. Unlike many traders who are glued to their computer screens or the TV, Laurens cares little for intra-day developments or media reports, instead remaining focused on historical price action and trend probabilities.

Bendsorp was featured in Van Tharp's book, "Trading Beyond the Matrix", in which he explains how he transformed himself from a losing trader into a world-class investor.

Despite this financial success, Bendsorp felt there was something missing in his life.

"After I developed the system that has given me financial independence, I realized that I missed teaching. I have a passion for helping others, and that personal need wasn't being met"

Bendsorp has been filling this 'need' in his life by writing and teaching.

In 2017, he authored the bestseller, "The 30 Minute Stocktrader" in which he detailed precisely how you can create systems and trade in less than 30 minutes a day. In 2020, he released "Automated Stock Trading Systems".

Bensdorp is the only author who teaches trading with combined, systematized, automated systems, according to your personality and presently trades a combination of more than fifty systems himself.

He also co-hosts seminars with his friend and 'market wizard' Tom Basso in addition to mentoring a select group of high net-worth individuals, financial advisors and family offices in his Trading Mastery School.

Finally, Bensdorp is the founder of Trading Mastery School, where he teaches other investors how to develop automated trading strategies customized to their personality, risk tolerance and financial goals.

In his personal time, Bensdorp is devoted to his personal foundation, "Fundación Albenco," which helps disadvantaged children in Colombia gain an empowering education.

Join the free newsletter and we'll share with you the first four chapters of Laurens' bestselling book, "The 30 Minute Stock Trader".

Work with Laurens

Are you consistently outperforming the market?

Do you have an automated system that provides helpful easy-to-follow instructions on how to trade in 'bull', 'bear' and 'sideways' markets?

Does your system work on 'autopilot' so you can focus on the more important things in life?

Do you have a system in place to deal with the realities of the new post-pandemic, Fed managed 'bubble' market?

Unless you answered 'Yes' to each of the questions above, you can benefit from the mentoring programs available through the Trading Mastery School. These mentoring programs are unlike any other program on the market because they begin and end with YOU.

My name is Laurens Bendsorp and I'd like to show you how to implement my proven trading strategies in your life.

Whether you're an experienced fund manager who wants to take his trading to another level or a newbie who's just starting out, I can help you become a master trader and join the elite group of traders who make the markets work for them.

I know what it's like to be in the trenches, struggling every day to remain profitable. Twenty years ago, I lost nearly 30% of my family's retirement account and spent the next decade studying the market every waking hour of every day. What I learned changed my life... and in good times and bad, through bubbles and busts, I've earned record-breaking returns in just 30 minutes a day.

My experience and the profits I subsequently earned were so powerful, I was featured by Van Tharp in his masterful book, "Trading Beyond the Matrix". I later authored two best-selling books "The 30 Minute Trader", and "Automated Stock Trading Systems", in which I've shared exactly how you can consistently and safely beat the markets in less than 30 minutes a day

NOW I WANT TO HELP YOU DO THE SAME.

I've developed an intensive training curriculum that will show you how you can *quickly* join the ranks of the top 1% of all traders in the world.

Better yet, you will learn how to detach yourself from your trading, so you're not emotionally involved. You'll learn how to design systems based on proven, historical price action, rather than on untested theories. You'll learn how to implement multiple non-correlated strategies so you can profit regardless of market direction.

What I will teach you isn't hard-but it does require discipline and commitment.

The research, innovation and years of soul-searching have already been done. By me.

In books and webinars, in workshops and seminars around the world I've shown over and over again how and why my systems are so powerful.

I'm willing to share that with you-if you're willing to go on a journey of personal discovery and achievement.

The Elite Mentoring Program calls for discipline to trade your plan; coming up with low-risk ideas, developing trading systems that have a proven edge and which do not correlate with each other. It requires developing the right risk and money management strategies, among other tools. And it all begins with creating a trading method that is uniquely designed for you, not anyone else.

You're probably wondering, "Is This Guy Worth My Time And Attention"?

For many of you reading this right now, the answer is 'NO'.

Here's why:

1 - I cannot help you get rich quick.

Learning how to trade profitably takes time, commitment and expectations that are sound. If you expect to make 100% + every year without risking any money, this is not the place for you.

Most of my students have substantial portfolios when they ask me to mentor them and are looking for consistent medium to high double-digit annual returns (20 - 70%). They know they need to risk money in order to make money. They know the more they want to make the more they need to be willing to risk. They know they will need to work hard while I mentor them to get the results they are after.

If you are expecting that you can turn \$50,000 dollars into millions in a few years, I'm not your guy, in fact, I now require that you have at least \$1,000,000 in liquid, investable assets. This may be cash, securities, your retirement plan, or even an expected inheritance.

2 - I cannot help you if you are not willing to invest time in your education. If you do not have an hour and a half a day available (or the ability to make up for it on the weekends), I can't help you. It takes time and effort to study and apply what you will learn from me.

3 - If you're looking for "The Easy Way", I can't help you. Change is hard. Profound change is even more difficult. It's important you understand what I'm telling you; I can help you, I just won't. I'm capable of it, but I refuse to do it, because I'm interested in helping people improve their lives. At this stage of my life, a small fee from you is not of any interest to me... I want to see you transformed into a world-class trader.

Why?

Because when I hear someone say, "What's the easiest way", what I'm really hearing is, "I'm not fully invested in the long term success of my own trading..."

And that really translates to "I don't want to work".

You're Still Here? Good.

So, who is a fit?

- First of all – You need to have a basic understanding of technical indicators or be committed to learn the basics. Don't worry. The stuff that I teach is not difficult but a willingness to learn is required

- Secondly - You must be willing to learn how to work with trading software, such as those you will use to interact with your broker platform, strategy software and data provider. Again, nothing hard or difficult. It is the same stuff I use. If you've not done it before, it will require some time to become familiar with it.

- Also - You must have enough capital or sufficient disposable income to be able to afford, and justify, my fee. It must make sense for you to work with me. This program is for high net worth individuals or large monthly cash flow earners who are willing to step up and excel in their trading results.

Lastly, you need to have read both of my books, "The 30-Minute Stocktrader", and "Automated Stock Trading Systems", before I will consider if you are a good fit.

Working with me requires a substantial investment. This is not some kind of home study course where you pay me and then you are on your own. I am convinced that the only possible way to help you achieve your objectives and get consistently profitable in the markets is through a very personalized approach. I've discovered that only those people who are willing to invest in themselves are worth my time.

If you qualify, and we choose to work together, here's what you get...

- We'll be working together for 6 months
- We'll begin with a one on one 'discovery' call with me where we break down your current trading process and what the next steps are and cut you what's not working.
- Together we will define the steps and work required for you. I do not use a template and force you to conform to it, because everyone is different and your needs and abilities are different from everyone else. Much of the customization of your plan will be based on the outcome of your Trader Personality.
- You will have access to one call per week with me.
- As long as you commit to one call per week with me, I promise you'll have an understanding of the plan and the confidence to execute it from start to finish.
- You have daily access to my programmer for technical support if needed.
- You have unlimited email access to me.

We can choose to do this on a month to month basis to see if we're a fit for each other, or we could choose to work with each other for 6 months, which also includes invitations to the "TMS Elite Mentoring live events".

Here's How It Works:

Below is an application where I ask you some diagnostic questions about your trading and your current situation.

I'm not at ALL trying to be nosy, I'm just really trying to weed out people for whom I'm not a good fit. I don't want you to waste your money, and I don't want to waste my time or yours. Think of it like a visit to a new physician; he needs to gather lots of information in order to be able to apply his training and expertise to your unique situation. It's the same with me; I must have accurate, detailed insight in order to know whether you qualify and whether I can help you. I routinely turn down applications which are incomplete or haphazardly completed.

Anyway, the application will come to me personally and one of two things will happen.

One, I'll decide we're not a good match and I'll let you know politely.

Or two, I'll decide we MIGHT be a good match and we'll have a discovery call to see if we really are. This is NOT a sales call.

Additionally, I am also going to ask for a "real person" refundable deposit of \$250.

Why?

First of all, I couldn't care less about your \$250.

However, I've discovered that \$250 is a 'good faith' down payment to know you are a real person and you're serious about this. After all, do you think a world-class physician or attorney will see you and diagnose you for free?

Of course not.

Anyway, I'll give the deposit back to you right back after we complete our initial call (unless we decide to work together – and in that case, we can apply it to your balance).

Nobody will pressure you or hassle you. If you want in, great. If not, no problem. We're cool either way.

Here's what will happen after that:

Once I have your “real person” deposit and your application we will set up a time to talk on the phone, Zoom, or Skype.

You will be speaking directly with me and we will review where you are at present, what you perceive as your challenges or shortfalls and what I think the realistic opportunities for growth are.

If we decide not to work together I'll return your deposit immediately.

And if you tell me I've wasted your time, I'll give you DOUBLE your deposit back immediately. (this has never happened)

You literally can't lose-I'm making you a 'better than risk free' offer. What does that mean? Well, worst case scenario, you double your money. Best case scenario, you'll learn secrets worth literally millions of dollars.

This opportunity is extremely limited because of the intense one-on-one time needed in order to provide you with the results I believe are possible. Whereas many people have purchased my books, only a very few qualify for my one-on-one mentoring program.

If you feel like this is right for you, submit your application below, pay your refundable deposit of 250 USD and I'll be in touch.
